

I-69 Bridge Rehabilitation in Shiawassee County

April - October 2011

What is Being Done?

The Michigan Department of Transportation (MDOT) will oversee a major project in Shiawassee County to repair 12 bridges along I-69 between M-52 and M-13. Included with the project is the replacement of the M-71 bridge over I-69.

How traffic is affected

Reconstruction of the M-71 bridge will require a full closure of the roadway over I-69. When M-71 is closed, traffic will be detoured to the adjoining interchanges - Grand River Road (Exit 113) to the west and M-13 (Exit 123) to the east.

Also, the following local roads will be closed at various times for bridge work: Goodall Road, Bancroft Road, Newburg Road, Vernon Road, and State Road. Bridge construction will be staged so no two adjoining bridges will be closed at the same time.

On I-69, there will be one lane open in each direction between M-52 and M-13.

When Will This Be Done?

Construction is scheduled to start in mid-April and is expected to be complete by the end of October.

(Note: A separate project is under way at M-13 and I-69. During this construction, one lane of M-13 will be maintained in each direction.)
